Problems with antisocial behaviour in public spaces
-----------------------------------------------

Mrs Clarke reported a problem with lorry drivers sleeping in vehicles overnight and the disposal of their sanitary waste.

There may be a traffic regulation area preventing vehicles over 7.5 tonnes parking up and driving overnight. Sussex Police won't enforce this as it's decriminalised and the responsibility of NSL.

The problem of transporters parking on the pavement was raised again.

Sussex Police advised contacting Jeremy Wassell at NSL.

Neighbourhood First
---------------------

Nothing to report from Neighbourhood First.

Some trees have had their bark peeled and will die. If the tree dies, Nicola asked if a fruit tree could replace it. Funding would need to come from the devolved budget. The majority of the cost is for planting and care.

It was asked if a drinking water fountain could be installed in the area.

ACTION:
Robert Price: Contact Plastic Free Eastbourne to see if a water fountain could be installed and how could it be funded.
Bins
----

No problems reported.

Charges at the tip
------------------

New charges are coming in for disposal of soil & hardcode, plasterboard, and bonded asbestos by East Sussex County Council.

It was asked if a skip can be left out a couple of times a year for residents. Andrew explained that businesses were using them instead of paying for commercial disposal.

If flytipping increases, it's Eastbourne Borough Council who have to pay to clean it up.

BT Building
----------

Nicola explained the history of the site to the meeting. An updated Flood Risk Assessment has been uploaded and the Environment Agency has removed their objection. There is no date for this to go before Planning at the moment. Cllr Mattock explained when it does go before the Council, only a small number of objections will be heard, so everyone who is concerned should write in.

AOB
---

Next meeting 5th December 2018 - 7:30pm at the Bridgemere Centre.
